Questions: fndc@fndc.ca

Dr. Gulati is a child psychiatrist who lost hearing throughout childhood, eventually becoming deaf and using ASL. His research focuses on Language Deprivation Syndrome. He is co-editor of the text, *Mental Health Care of Deaf People: A Culturally Affirmative Approach*. He is staff psychiatrist for the Deaf & Hard of Hearing Service at Cambridge Hospital and the Deaf & Hard of Hearing Program at Boston Children's Hospital, and on the faculty at Harvard Medical School.
